

## Electric Angle Series E-RAD BLU-90°

The precision torque wrench series E-RAD BLU is designed to provide a high degree of accuracy and advanced data logging for high torque assembly applications. Every controller can be used in combination with multiple models wrenches. The built in bluetooth unit allows the torque wrench to communicate with the RAD Smart Socket directly.

- Torque/angle controlled shut-off
- Repeatability  $\pm 3,0\%$
- Angular gear for hard-to-reach places
- Data logging and tool management features
- Multi-user level password protection
- Operation by  $\mu$ LCD-touchscreen
- Bluetooth field calibration with the Smart Socket
- One controller can be used with all models wrenches
- Integrated cooling system for continuous operation

Type	Drive size	Torque [Nm]		RPM [min <sup>-1</sup> ]	Weight [kg]	Dimensions [mm]			
		min.	max.			A	B	C	D
E-RAD BLU 3400-90°	1"	340	3.400	11	8,3	232	77	77	245

## OPTIONS

---

- Control unit with 120 V
- Cable length 7,5 m (Other lengths possible on request!)
- ProTight™ worker guidance system

## ACCESSORIES

---

## SCOPE OF DELIVERY

---

- Electric torque wrench E-RAD BLU-90°
- Control unit with 230 V
- Control cable 4,5 m
- Reaction arm with two retaining rings
- Documentation System
- Calibration certificate
- Operation manual
- Tool case
