

Low Profile Series LOW

The LOW series hydraulic torque wrench is compact, flat and slim. The design makes it perfect for height-restricted applications. The torsion retaining pawl system achieves maximum efficiency as bolt torsion is restricted with each stroke, optimising direct preload force transmission.

- High resistance with aluminium-titanium and light body
- 700 bar maximum operation pressure
- Repeatability of $\pm 3,0 \%$
- Torsion retaining ratchet system
- $360^\circ \times 180^\circ$ multi-positional swivel quick release couplings
- Interchangeable cassettes with small head radius
- Suitable for continuous operation at maximum pressure
- Pressure relief valve prevents over pressure

Support extension

SCOPE OF DELIVERY

- Hydraulic torque wrench LOW
- Interchangeable cassette
- Torque table
- Calibration certificate
- Operation manual
- Tool case (to type 14 LOW)
