

Battery Series B-RAD Offset

The battery torque wrench series B-RAD Offset has an offset gearbox, which allows the tool to reach difficult bolting spaces. The tool is also available with a two-stage automatic and ideally suited for most applications. Its advantages are the slim and short design and in its ease of use. Due to the brushless electric motor, the lifetime of the tool is increased. Furthermore these tools can be used for valve actuations.

- Torque controlled shut-off
- Repeatability $\pm 4,0\%$
- Digital torque setting by the value of 10 Nm
- Offset gearbox for difficult to reach spaces
- Brushless electric motor
- Automatic load release
- Slim and short design
- Clockwise/anticlockwise rotation
- Lithium-ion 18V / 5,2Ah battery technology (8,0 Ah optionally)
- Standard tool or tool with 2-speed automatic
- Screw position lighting optionally
